

Camera Recommendations 2019 - 2020

Features to Consider:

Auto Focus: Capturing a lot of action? Auto Focus helps remove motion blur from photos, and keep your action shots crisp!

Image Stabilization: On the move? Image stabilization corrects unsteady hands, helping you capture clear photos.

Continuous Shooting (Burst): Capturing a long moment with a lot happening? This feature catches several frames in a burst over time. Similar to shutter!

WiFi + Bluetooth Enabled: Looking for versatility? Having wireless features offers photo transferring between devices.

Shockproof, Waterproof, & Dustproof: Need something strong? These features will help prevent damage from common mishaps.

High Speed Shutter: Action shots can happen rapidly. High speed shutters range between 1/4000th to 1/16000th of a sec! This is how FAST a photo is taken!
